

DC of Amarillo  
308 N. River Oaks Dr.  
Burnet, TX 78611

To whom it may concern:

My name is Dickey Tolbert. I have driven a truck and done routine maintenance on all three of the trucks owned by DC of Amarillo for the past four years. Prior to driving trucks, I was a diesel mechanic for 12 years. The owner approached me with S3 oil enhancement about two months ago. I did not want to use it because I have used Lucas in all of our applications for years. We first treated a 2001 Kenworth W900L with a 500 hp Caterpillar C15. This truck and trailer is heavy and has over 1.1 million miles on it. The guys at B-Line in Brookshire, TX replaced one and a half gallons of oil with the S3. The first tank we saw a half of a mile per gallon improvement in our fuel economy. A week later, we put half a gallon of S3 in the rear ends and transmission. Immediately after treat our auxiliaries we noticed all the vibration and rumble in the cab was gone. The driver of that particular truck said, "It is like it is free-wheeling". To our surprise our fuel mileage came up even further. This 2001 KW went from 4.7 miles/gallon to 6.4 miles/gallon running the same route under the same condition. We have even noticed the oil temp is lower than the water temp and out auxiliaries are at least 20 degrees cooler than normal. We have treated the other two trucks and have seen no less than a one mile per gallon increase. This is the best product I have ever used. We intend to use it on every oil change because the savings are so great. Our estimates show we are saving over \$1700 per truck per oil change at todays price. You have a customer for life.

Dickey Tolbert
