To: S3 Oil Enhancement

My name is Daniel Champeau. I own DCSE, Inc. We are a small trucking company with three trucks and three end dump trailers. I have been using S3 Oil Enhancement for a few months now with phenomenal results. Our 2002 Kenworth W900L has 861,000 miles on it and has never been overhauled. Prior to using S3, that truck was using oil and kept using more and more as the weeks moved on. We finally took the truck to French Ellison Kenworth in San Antonio, TX on 4/7/10. The shop found that the wrong air filters had been installed by Speedco in May of 2009. Our truck had been sucking in dust for almost a year. They found one and a half inches of dirt in my oil pan, the turbo was pitted and the air to air had so much dirt inside that it actually had split open. French Ellison presented me with an \$18,000 estimate to rebuild the Caterpillar C15. Not having the funds to do so, we decided to flush the engine, replace the air to air and install S3. We picked up the truck on 4/16/2010. The driver who has had this truck since July of 2007 could not believe the way the truck drove. We put half a gallon each in the two rear ends and the transmission. The remaining four and a half gallons went into the engine along with Rotella 15-40 to the proper level. We have now been over 8,000 miles since picking up the truck and have not put any additional oil in. The most impressive part is we have lost all of the vibration, rumble and our fuel mileage went from 4.9 miles per gallon to 5.7 miles per gallon. S3 is far superior to any other product, even Lucas. My drivers tell other drivers this story everyday along with their own personal experiences and hopefully grow the brand. Ya'll have a customer for life.
